Industrial and Commercial.

MINE, MILL AND RAILROAD.

George Giles, of Carbondale, according to the Leader, is the inventor of a device for washing coal and culm that promises in a short time to supersede all other machines intended for that purpose. The manner in which he came to devote his attention to devising a washer is somewhat out of the ordin a washer is somewhat out of the ordin-ary. W. P. Williams was a coal opera-tor who had a small breaker on the Fallbrook side of the city near the Mur-rin colliery. Mr. Williams' coal fell into disrepute on account of the large amount of dirt mixed with it. Sales fell of and one day be found himself with off and one day he found himself with about 4000 tons of mined coal on his hands but which it was necessary to wash before purchasers could be ob-tained. He was a man of limited means and could not see his way clear to pur-chase outright one of the expensive washers in use at other collieries. Mr. Glles was sought out and his figures asked concerning the cost of erecting a simple one at the Williams breaker. This lead him to planning a cheaper washer and the result is that he has obtained one that will cost but a tenth part of any machine now in use and the results of which are preferable. Mr. Glies has applied for a patent for his invention and it is but a few days be-fore the letters patent will arrive, as investigation of the different devices already on file at Washington show that there is nothing with which this conflicts. A company will be formed at once and the washer manufactured and put on the market. All who have seen its operation are delighted with the simplicity of the machine and the work

The experimental washer constructed by Mr. Giles was erected at the Williams' breaker and has been in opera-tion for some time in the most satisfactory way. A number of prominent men of Carbondale have witnessed its workings and were so impressed that none of the stock of the new company will be allowed to go out of the city.
Mr. Williams' coal is again in demand and Mr. Giles has invented an article which will soon bring him a handsome revenue. It consists of a cast iron tub varying in sizes from three to twenty feet in diameter according to the amount of coal to be washed. It is es-timated that the twenty feet tub will wash one ton per minute. Through the centre of the tub runs a shaft having a number of wings. The dirty coal or culm drops from a chute through an opening in one side of the tub and is revolved in its interior till it reaches a second opening through which it passes on to a perforated sheet. The tub is keep constantly filled with water from a pipe overhead and this water leaves the cleaned coal as the latter strikes the perforated sheet. The coal is passed on to the screen and thence into the chutes in marketable shape. A coal washer of the intricate pattern recently erected near Carbondale cost \$8000. The cost of one manufactured under Mr. Giles' patent is estimated at \$300.

Report from all quarters show that the general condition of the anthracite business is better now than it has been for months past, and the outlook ahead for further improvements is good. Prices are being well maintained. The

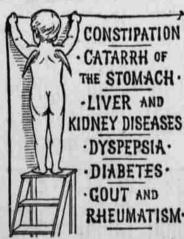

to Europe by a new steamship route from the eastern end of Long Island to England. There has just been made an application to the aldermen of Brooklyn for permission to tunnel from the shore of the East river to Flatbush and Atlantic avenue. The tunnel will be not less than fifty feet below the surface, and buildings would be undis-turbed. There are some important structures in Brooklyn along the line of the proposed subway. The Hotel St. George, the city hall, the court house, and hall of records, all the big Fulton street dry goods boyses and other great structures in Brooklyn along the line of the proposed subway. The Hotel St. George, the city hall, the court house, and hall of records, all the big Fulton street dry goods houses, and other great buildings will stand partly over the underground route.

"a and Big Four 1/2.

The range of today's prices or the active stocks of the New York market are given below. The quotations are furnished for the Tribune by G. du B. Dimmick, manager of William Linn, Allen & Co., stock brokers, 412 Spruce street, Scranton.

Op'n- High-Low

President Borg and a party of fifteen directors of the Wilkes-Barre and East-ern railway on Thursday made an inspection tour of that property. A Wilges-Barre Record reporter in con-versation with one of the directors last night learned that the visit had noth-ing to do with the rumored rupture in the coal combination. "We have no in-terest in the matter that I know of," he salid. "So far as our own tonnage is concerned, we are satisfied with the results already attained. We are getting new business every day, the coal traffic on the Wilkes-Barre and Eastern being particularly satisfactory. Of course,we are devoting special attention to coal and freight on this end of the line just now, but we don't intend to stop there by any means. We recognize the fact that we have the shortest route from Wilkes-Barre to New York city, by two hours. That means a good deal in these days of fast travel. We also recognize the fact that the resources of this city and vicinity are well nigh inexhausti-ble, and that, in the near future, you will have increased your population two-fold. Our road is a little crooked just now, but we're straightening out the kinks, and this will reduce the time still lower. We mean to push our advantage in this respect, without delay. And talking about quick travel." added, "what would the business men of Wilkes-Barre think of a first class fast passenger train that would take them to New York in four hours or less? Leaving here at, say 9 a. m., they

These are some of the diseases that are cured by the Carlsbad Sprudel Salt. It is the veritable water of the Sprudel Spring--evaporated, solidified, concentrated. In every ailment of the kind, Carlsbad has become famous the world over, and for hundreds of years, as a prompt, permanent, natural remedy.

Beware of imitations sold as "improved" or "artificial" Carlsbad Salt. which consists only of ordinary Seidlitz Powder and Glauber Salt, and are sold by unscrupulous dealers upon the reputation of the genuine.

Be sure to obtain the genuine imported Carlsbad Sprudel Salt only, with the seal of the city of Carlsbad, and the signature of "Eisner-& Mendelson Co., Agents, New York," on every bottle.

The Delaware and Hudson Coal company issued orders yesterday that on and after Monday next all their coal colleries would resume work on full time. They employ over 10,000 miners, laborers and outside hands,

MINOR INDUSTRIAL NOTES: The New York, Ontario and Western has decided to lay a second track, so heavy has the traffic of the line be-

The Central Traffic association has advanced rates on grain, Chicago to New York, 5 cents per hundred-weight, going into effect Nov. 12.

The Mexican railroad has for several years past bean receiving from Fig.

years past been receiving from England steel crossties at the rate of 50,000 a year, and will soon have its entire system provided with with steel ties. They weigh 115 pounds and are practically indestructible.

The Westinghouse Air Brake com-pany's works at Wilmortings, which have been only working seven hours a day and four days a week for many months, in addition to laying off a large number of men, have resumed opera-tions to their full capacity.

John Wanamaker has declined to al-low his name to be used as a candidate for president of the Philadelphia and

Reading road, assigning as a reason the refusal of a certain interest to come

the refusal of a certain interest to come to his support. This is supposed to be the interest held by friends of the Pennsylvania road.

Aldace F. Walker, receiver of the Santa Fe, thinks the anti-pass agreement a good move, and will give it his hearty support. He is very confident that this will do away with much of the friction between competing lines. the friction between competing lines which indulge freely in issuing passes to influence business.

The employes of the Western New York and Pennsylvania railway, at a meeting in New York, called to decide what action should be taken towards securing a restoration of the 10 per cent. reduction which was made seven months ago, decided not to strike, but to seek the restoration by bringing suit in the courts,

President Sloan, of the Delaware, Lackawanna and Western, says: "No unusual significance attaches to the meeting of our board Friday. It is the regular monthly conference. We are not interested in anything that the oth-

not interested in anything that the other anthracite coal people are doing; we are only concerned as to what the Lackawamna is doing."

A change in the management of the Cornwall and Lebanon railroad has been made. B. Dawson Coleman has been elected president, and Edward R. Coleman, L. Heber Smith, Walter Scranton, Archibald Rogers and Henry T. Kendall have been closen directors. T. Kendall have been chosen directors. The board now consists of the above newly elected members and John Meily, J. H. Redsecker and C. Shenk.

STOCKS AND BONDS.

By the United Press.

New York, Oct. 26.—There was a fall-ing off in business today at the Stock Exchange; the total sales amounted to 84,310 shares against 91,150 shares yesfor further improvements is good. Prices are being well maintained. The corporations mining and carrying anthracite are now working in closer harmony, and the restriction of the output of coal is being more rigidly adhered to than at previous time this year. The demand for egg, pea and buckwheat coal is an excess of the immediate supply.

It is proposed to construct a tunnel from Jersey City to Brooklyn connecting the Pennsylvania rathroad and the shares against \$1,150 shares yesterday. Speculation opened steady and then an improvement in the rail-way list followed. The coalers were again weak and low. The bears appear to be feeling their way in these issues, preparatory to a vigorous campaign later on, based on the demoralization in coal prices, which they anticipate will follow the policy of unlimited production. They are proceeding cautiously, as their experience in this group of late years has been anything but pleasant. New Jersey Central deing the Pennsylvania radiroad and the Long Island railroad, and forming a link in the line of travel from this continent to Europe by a raw stampelin 234 to 1254, recovered to 1364 and ed at 126; Lackawanna fell 11/2 to closed at 125; Lackawanna fell 1½ to 162½ and Reading ¾ to 16½. The sales of these stocks were 16,400 shares. Speculation left off steady. The general lists showed net losses for the day of ½ to ¾ per cent. Reading lost ¾. Lackawanna ½, and Delaware and Hudson 2 per cent. St. Paul gained ½ and Big Four ½.

The range of today's prices on the sales.

A MUSICAL MOUNTAIN.

A Peculiar Natural Phenomenon in the Mining Regions. From the Virginia City Enterprise.

In the old Truckee mining district, down the Truckee river, near Pyramid lake, is situated Nevada's musical mountain. This mountain was first discovered by the white settlers in 1863, at which time there was some excite-ment in regard to the mines found in the neighborhod. The discoverers were a party of prospectors from the Comstock. They had pitched their tents at the foot of the mountain and for a few evenings thought themselves bewitched. Each evening, a little after dark, when the air was calm and all was quiet, a mysterious concert began. Out from the face of the big mountain were wafted soft strains that seemed to cause the whole atmosphere to quiv-er as they floated over the camp. The music then appeared to pass over it un-til it was far away and almost lost in the distance, when beginning with a tinkling as of many little silver bells, there would be a fresh gust of sweet

During the daylight hours little the mysterious music was heard and it was settled that it was not caused by the wind. A spring near which the explorers had pitched their tents afforded the only good camping grounds in the neighborhood, and as each new party of prospectors arrived at the spot the wonder grew. Some Plute Indians who came along and camped at the spring were found to be acquainted with the peculiar musical character of the mountain. They called it the sing-ing mountain. Some of the men in the camp became more interested in the mountain than in prospecting, and gave most of their time to an investiof the mystery of the musical sounds heard to proceed from it. They found that the whole face of the mount-aln was covered with thin flakes of a hard crystalline rock. There were great beds of these flakes.

The investigators concluded that the musical sounds heard proceeded from loose material, huge drifts of which seemed to be gradually working their way down the steep face of the moun-tain. At all events the strains heard at the foot of the mountain in the evening's stillness seemed to be produced by the uniting and blending of the myrlads of bell-like tinklings proceeding from the immense beds of saltry debris creeping down the slope. The solution of the mystery of the musical mountain is the only one worthy of notice.

As no mines of value were found the district was soon deserted and has since seldom been visited. Therefore few except the old-time prospectors know much about the singing mountain.

A Great Change. "Cholly seems to be changed since his trip away, doesn't he?,, Frances—Indeed he does—seems like an other girl almost,—Chicago Inter-Ocean.

Proposals.

CEALED PROPOSALS WILL BE REceived at the office of the City Clerk.
Scranton, Pa., until 7.20 o'clock p. m., Thursday, November J. 1894, to construct the substructure, including excavations and masonry, for bridge over the Roaring Brook, from Spruce street to Front street. Each bidder shall inclose with each proposal a certified check for 10 per cent, of the suncount of his bid, as a guarantee that the contract will be executed. The check of the successful bidder shall be forfeited to the city if he shall fail or refuse to execute a contract for the performance of the work and a bond in the sum of ten thousand dollars, conditioned, for the faithful performance of the work under said contracts. The checks of unsuccessful bidders shall be returned to them after the contract is awarded. The city reserves the right to reject any and all bids.

By order of City Councils.

By order of City Councils.

M. T. LAVELLE, City Clerk.

Scranton. Pa., Oct, 25, 1894.

SEALED PROPOSALS WILL BE RECeived at the office of the City Clerk,
Scranton, Pa., until 7.30 o'clock p. m., Thursday, November 1, 1894, to construct the substructure, including excavations and masonry, for the Linden Street Bridge over the
Lackawanna river. Each bidder shall inclose
a certified check for 10 per cent. of the amount
of his bid as a guarantee that the contract will
be executed. The check of the successful bidder shall be forfeited to the city if he shall fail
or refuse to execute a contract for the performance of the work, and a bond in the sum
of ten thousand dollars, conditioned, for the
faithful performance of the work. The checks
of unsuccessful bidders shall be returned to
them after the contract is awarded. The city
reserves the right to reject any and all bids.
By order of City Councils.

M. T. LAVELLE, City Clerk,
Scranten, Pa. Oct 23, 1894.

Dr. Wood's Norway Pine Syrup cures coughs and colds quicker than any other remedy, because it combines the lunghealing quality of the pine tree with other valuable medicines. Sold by all dealers on a guarantee of satisfaction.

WE ARE NOT "SOLE AGENTS" for Priestley & Co.'s Black Dress Goods, but we always carry a complete line in stock, and we are always up to dute with their Newest Weaves and Latest Novelties. If a lady contemplates buying a Black Dress there are many reasons why it should be a "Priestley." A few of these reasons:

First-Because all grades of Priestley Goods are manufactured from the very best quality of Silk and Australian Wool.

Second-Because the dye is always the same unchangeable reliable Black, which never grows rusty or gray with age.

Third-Because the weave is firm, and they never stip or fray.

Fourth-Because they can be easily cleaned, washed in soap and water, if necessary.

First-Because they are all dyed in one standard shade of black, and one style weave can always be matched in shade by another, and old with the new.

Sixth-Because they are guaranteed by a guarantee which means something.

Among the best things shown are: Camel's Hair, Cheviots, Cravenette Serge, the Granite Weave, Armours, Silk Warp Henrietta, Metelase, Melrose, Eudora, etc. The last named "Eudora," being the very latest Cloth out. The "Eudora" is a triumph in textile weaving. It is a Silk Warp, and exquisite in its rich softness. Some say "it's only a Henrietta."To those we say, you are mistaken; it's more than a Henrietta. You ask wherein it is better? Well, a Priestley Henrietta did seem as near complete excellence as it is possible to reach, but the Eudora has all its good qualities and several superior ones, making it the most perfect smooth faced fabric in the world. It has extra width. A great advantage, too, in these days of Umbrella Skirts, Full Coats, etc.

It has extra weight. Not so heavy as to make it too warm for a good all-around-year's dress, but just enough ier than the Henrietta to give it the appearance of having the body of a Ladies' Cloth without its overburdening warmth. It positively will not catch the dust. The dust shedding qualities of Priestley's goods have always been their strong feature, but the Eudora has been experimented upon, until it is an improvement over all and the climax of perfection is reached. The Endora is young and new, but in a short time all women will find it their "friend in need," for

it will always be ready for wear. Our usual low prices prevail on all Priestley's goods.

TO OUR PATRONS:

Washburn-Crosby Co. wish to assure their many pat-rons that they will this year hold to their usual custom of milling STRICTLY OLD WHEAT until the new crop is fully cured. New wheat is now upon the market, and owing to the excessively dry weather many millers are of the opinion that it is already cured, and in proper condition for milling. Washburn-Crosby Co. will take no risks, and will allow the new wheat fully three

months to mature before grinding.

This careful attention to every detail of milling has placed Washburn-Crosby Co.'s flour far above other

MEGARGEL & CONNELL Wholesale Agents.
